

# PARKS HIGHWAY

## BROAD PASS MP 194 RAILROAD OVERCROSSING and MP 192-194 RESURFACING

The Alaska Department of Transportation, in partnership with QAP, is returning to Broad Pass for the third and final year of the project, approximately 1.7 miles. Work will resume in late April, with the remaining work on the new Middle Fork Chulitna River Bridge and the new railroad overpass. Once the bridge is complete (expected to be in early June), traffic will be detoured onto the northern end of the new alignment, utilizing flaggers and a pilot car while the remaining new alignment is built (the south end). Once the overpass at the railroad crossing is complete, traffic will be moved onto the entire realignment. At this time, the work zone will extend from MP 194 to 192 of the Parks Highway to include necessary reclaiming and repaving, including new culverts for improved drainage. We will do our best to keep you informed as work progresses and appreciate your patience and cooperation during construction. This project is scheduled for completion in late August 2016.

### Planned Project Details:

- Work will start in late April 2016.
- Expect flagging operations to start in May, with PILOT CAR operations beginning in June.
